

## MD'S DESK

Dear all...

The year of 2009 witnessed a great beginning and had energetic activities that made our company surge forward. The year was beaming with full potential and we made our presence felt at national level by getting the FROST & SULLIVAN award for the "Emerging Company of the Year- 2009" for Indian Water and Waste water Treatment Equipment Market showcasing our growth.

The year 2009 now coming to an end gives me hope that this decade has laid the foundation of our company and the coming decade beginning with 2010, raises the company to higher platform and reach greater heights. In particular the month of December was eventful to the extent that we consolidated all our energy to get new orders in new business vistas.

This financial year's 1<sup>st</sup> Quarter Management Review Meeting was a revelation of sorts and I could see awareness and involvement of Staff from all levels. My appreciation goes to the Lab Team for bagging the Best Department Award for System Implementation and I expect other departments to emulate their team spirit and hard work.

The events organized as part of Christmas and New Year Eve celebrations was appreciable as it became an occasion to express oneness and a sense of one family by sharing gifts and also a moment to rejoice for the past year that went past smoothly and to look forward for the new year with lots of hope and promises.

In all, let us hope the year 2010 assures a good leap in our business more people to join the team bringing more synergy in our activities and make this new decade promising to all of us.

I sincerely wish all our associates, clients, business associates a healthy and harmonious New year.

Regards,

S.Suthakar

## AQUA DESIGNS LABORATORY SERVICES

Our laboratory is your single source to meet all your statutory requirements.. We have satisfied many customers with our impeccable services and look forward to doing business with you.

### STATE OF THE ART

Occupying floor space of 2500 sq.feet, our laboratory uses state-of-the-art technology, and serves a diverse clientele in a wide variety of fields. We perform both lab and field work, and our Mobile Lab offers pickup and delivery of water samples and analyzed reports including on site sampling and analysis providing 24 hours service.

Latest equipments like GC, AAS, UV-VIS Spectrophotometer, Microscope, Respirable Dust Sampler. Stack Sampler,etc , approved by TNPCB are used to support our quality services.

We are also well equipped to conduct testing for different types of microorganisms.

We also meet the requirements of ISO/IEC 17025 "General Requirements for the Competence of Testing and Calibration Laboratories."

### ACCURACY

Accuracy is a result of skilled, experienced personnel and sophisticated equipment. We employ highly trained, certified personnel with combined experience and practical know-how. Our laboratory is applying its collective expertise in accordance with nationally recognized codes, standards and specifications required for the Transportation, Pharmaceutical, Automotive, Military, Environmental, Utility, Manufacturing and other industries.

### VERSATILITY

We offer a spectrum of technical services in

- Environment Impact Assessment Studies
- Environment Management Plan
- Water Audits
- Water Analysis
- Soil Analysis
- Purity of Water Treatment Chemicals
- Analysis of Water formed Deposits
- Indoor air quality testing
- Pilot Plant Studies
- Agricultural Product Analysis
- Stack Monitoring and testing
- Ambient Air Quality Monitoring
- Noise level monitoring and PCB Consultancy

### TRACEABILITY

Standards used are traceable to the National Institute of Standards and Technology (NIST) or a nationally accepted measuring system.

### VALUE - PRICED

We invite you to explore our competitively priced services. Technical assistance is as close as your telephone.

**Call 91-44-37171717 to learn how we can help you fulfill your testing and analytical needs.**

**MANAGEMENT REVIEW MEETING**

The 1st Quarter Management Review Meeting was conducted in our premises with all departments projecting their achievements and way forward. The Rolling Trophy for Best Department in System Implementation was instituted as an appreciation to the winners and motivation to others. The Trophy was bagged by the Lab Team for their outstanding performance.

**A PROUD MOMENT....**

Aqua Designs bagged the prestigious award from **FROST & SULLIVAN** for “Emerging Company of the Year- 2009” for Indian Water and Waste water Treatment Equipment Market. The award plaque was presented at the Frost & Sullivan awards banquet held on 16<sup>th</sup> December 2009 at Hotel Intercontinental The Lalit , Mumbai.

**CHRISTMAS CELEBRATIONS**

Christmas was celebrated in style with associates participating enthusiastically in the events organized for the occasion.

**SITE VISIT**

A group of Associates visited Paalsun Engineering to gain first hand knowledge on fabrication as part of their training experience

**TRAINING**

A product presentation on Wilo Pumps was organized for our associates to know more about their range and applications.

**NEW YEAR EVE CELEBRATIONS**

The ringing in of the New Year was marked by various interesting events organized to entertain the Staff and bring about a mood of celebration.

Every time New Year's Day comes around, everyone decides there is something about themselves they would like to change, thus - the New Year resolution was "invented". Whether you're looking for one, or curious to see the most popular New Year's resolutions, check out the list of the top 10 most common New Year's resolutions.

### 1. Spend More Time with Family

This kind of ties in with enjoying life more, because today we are too busy with work and other activities to stop and enjoy a day with the family. You should make an effort to spend time with family as much as possible. Devote at least 1 day a week if possible to have a family day. Sunday's are great days to spend with family. Again, life is very precious, and you cannot get it back once it's gone. You don't want to look back when your 70 and tell yourself "Wow, I should have spent more time with my kids". Life is a gift, cherish it.

### 2. Lose Weight

Losing weight is a great first start to a healthier lifestyle, and a healthier body. It benefits you medically, also, to lose weight. Your chances of diabetes, heart attack and stroke drop when you are at a healthy weight range. This is the best gift you can give yourself and family, and it is a great New Year's resolution.

### 3. Get Out of Debt

Many are in debt today, and the way the economy is right now, it doesn't look like it will get better any time soon. Try to quit using your credit cards, and do not apply for any more loans. That way, when you start to make a little extra money, you can focus it on paying off your debt. It can be very overwhelming, trust me, but it can be done.

### 4. Enjoy Life

In today's time, everyone are so busy running here and there to stop and smell the roses. Take a day off from your daily activities once a month to enjoy life and what it has to offer. Life is too short to be miserable all the time. Time is precious and it's something you cannot get back once it's gone, so make sure you enjoy it.

### 5. Get Fit

Getting fit is not exactly the same thing as losing weight. There are plenty of people who are way out of shape, but are well within their healthy weight range. Go to your doctor for a physical, and make sure that your body is healthy. Start to go for a walk everyday with your kids, or a friend. Pilates is another great way to tone up, and is very relaxing. If you are tired all the time, exercise is great for giving you energy, believe it or not! Eating healthier too will help your body become healthier on the inside.

### 6. Quit Smoking

This is yet another beneficial New Year's Resolution for not only you but your friends and family. Quitting smoking now greatly reduces your chances of cancer. Not only that, your second hand smoke can harm other people as well. It's a nasty habit anyway, so why not kick it for your New Year's resolution?

### 7. Quit Drinking

Remember, this is New Year's Day, not New Year's Eve, so what a perfect time to quit drinking than the day after New Year's Eve when you have a huge hangover? Seriously though, severe drinking can be very hazardous to your health. A drink with dinner or a night out with the girls/guys every now and then would be okay, but try to limit yourself. There isn't a better gift to other people than to make sure you'll be around..

### 8. Help Others

Helping others is a great New Year's resolution, because in today's time, people forget to help their friends or family. Try putting your friends or family first for a while, and helping them with their problems, or volunteer at a retirement home and bring joy to a stranger's life. It is very rewarding!

### 9. Learn Something New

Have you ever wanted to learn a new trade, sport, or a new language? Its great to learn new things everyday. How about taking up a Spanish course, or learn how to play golf? Life gets pretty dull if you're not learning anything. So, go stimulate your mind and learn something!

### 10. Get Organized

For many, getting organized can be a great New Year's resolution. Everyone love to be organized, but it seems you can never get that way. You try to organize bills, but they eventually end up in the car, floor, drawer, etc. You would love to have your clothes organized, but usually they are either in a laundry basket, or in the dryer. You know if you were better organized, your life would be much easier. Getting organized is definitely a great resolution to have.

## NEO AQUANAUTS

**Mr. S. Nagarajan**  
has joined as Head - Field Services.  
His career spans to more than 25 Years  
of Experience in the Water Treatment Industries.

**Mr. R. Shumugarajan**

joined as Manager E&I (E&C Dept)  
and has vast experience in the  
line of field for 18 years.

**Mr. M. Venkateswaran**  
joined as Field Chemist Lab  
and has around 1 year of  
experience in the Field.

## AQUANAUT'S CREATIVE CORNER

### SIMPLE STEPS TO STOP GLOBAL WARMING BY

**Mr. K.JAYARAM**  
Project Manager

There are ways you can help cut greenhouse gases  
and help stop global warming.

They are simple things, but can make a difference if everyone  
does them!

- ☛ Re-cycle glass bottles, jars, newspapers and magazines and tin cans. Save them and take them to local re-cycling centres.
- ☛ Re-use plastic shopping bags and envelopes, don't get new ones
- ☛ Persuade you mum or dad (or whoever does the gardening) to have a compost heap.
- ☛ Put a brick in a plastic bag into your toilet cistern, and then the toilet will use less water each time you flush. Don't worry that's plenty of water to get rid of...
- ☛ Use paper on both sides.
- ☛ Try and buy products that don't use much packaging.
- ☛ Give unwanted gifts and clothes to a charity shop.
- ☛ Only fill the kettle up with the amount of water you need to boil that time.
- ☛ Don't leave the TV or video on standby.
- ☛ If you get lift to school in a car, take your mates along for the ride.
- ☛ Ask whoever does your washing to use the machine at 40 degrees, this helps conserve power.
- ☛ Switch lights off when you're not in the room
- ☛ Get a clockwork mobile phone recharger
- ☛ Cycle to places!
- ☛ Have showers instead of baths.

## NEW PROJECTS

Established in 1886 Coca-Cola owns four of the world's top 5 nonalcoholic sparkling beverage brands. It has 90,500 associates worldwide and operates in 200+ countries. It has a Beverage Variety of more than 2,800 products.
